MHB/AGRØN/ÇESOC/PHIL 565: The Ethics of Modern Biotechnology

Syllabus, Spring 2016

Robert Streiffer

A. Administrative Information
Instructor: Professor Robert Streiffer
Class: 1335 Sterling, Tuesday, Thursday 2:30-3:45
Office Hours: By appointment
Bioethics Office: 1411 Medical Sciences Center; 262-7490
Philosophy Office: 5101 Helen C. White Hall
E-mail: rstreiffer@wisc.edu

B. Course Description
This course is for graduate students and upper-level undergraduates. It is an in-depth study of a selection of ethical issues arising from the application of modern biotechnology to microorganisms, plants, non-human animals, and human beings. We will aim at a discussion that is informed both by empirical research and by work done in ethical theory, political philosophy, and other relevant disciplines, and whose character is rigorous, clear, nuanced, and unbiased.

C. Materials:
- The readings will be available through Learn@UW.
- Handouts and news articles distributed in class
- Because the debate is very polarized, you should be careful about relying on the web for information about modern biotechnology. While recognizing UW-Madison’s own interest in promoting biotechnology, a good place to start is nonetheless http://researchguides.library.wisc.edu/c.php?g=177819.

D. Objectives
There are two overall goals of the course:

1. To improve your familiarity with the facts, concepts, theories, and arguments from the relevant scientific, ethical, and political literature.
2. To improve your ability to think about and discuss the ethical issues in this area.

More specifically, I expect you to be able to do the following by the end of the semester:

3. Be more appreciative of opposing viewpoints on controversial ethical questions.
4. Be a more responsible consumer of media reports on controversial technologies.
5. Be clearer about your own views on these matters.
6. Define relevant scientific concepts.
7. Define relevant ethical concepts.
8. List the main applications of biotechnology which have raised ethical concerns.
9. Explain how recombinant DNA techniques are used in those applications.
10. List the main ethical arguments for and against each of those applications.
11. Analyze the main arguments from the literature, pro and con, for each of those applications.
12. Assess the reasonableness of the scientific claims made in those arguments.
13. Assess the reasonableness of the ethical claims made in those arguments.
14. Integrate the discussion of science, ethics, and political philosophy to formulate a positive argument for or against applications of biotechnology.

E. Grading Plan:
I use the following grading scale, with your final numerical grade rounded to the nearest letter grade:

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Numerical Equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4</td>
</tr>
<tr>
<td>AB</td>
<td>3.5</td>
</tr>
<tr>
<td>B</td>
<td>3</td>
</tr>
<tr>
<td>BC</td>
<td>2.5</td>
</tr>
<tr>
<td>C</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
</tbody>
</table>

F. Requirements:
- Attendance: 5%. Attend all the classes. I will be taking attendance, both to grade attendance and to help me learn your names. Any excused absences for reasons other than an emergency must be cleared in advance of the class missed. For all excused absences, you must send me an e-mail stating the date and the reason so that I will have a record of it when it comes time to calculate your final grade. Any unexcused absence will affect your attendance grade as follows:

<table>
<thead>
<tr>
<th>Absences</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>AB</td>
</tr>
<tr>
<td>3</td>
<td>B</td>
</tr>
<tr>
<td>4</td>
<td>BC</td>
</tr>
<tr>
<td>5</td>
<td>C</td>
</tr>
<tr>
<td>6</td>
<td>D</td>
</tr>
<tr>
<td>7</td>
<td>F</td>
</tr>
</tbody>
</table>

- Quizzes: 25%. There will be several short, in-class, unannounced quizzes. These will be on the readings assigned for that day or on concepts or theses that were introduced in a previous class. They will possibly include short-answer, multiple choice, fill-in-the-blank, and true/false questions. If you have an excused absence on a day when there is a quiz, your grade will be computed as if the quiz you missed did not occur. If you have an unexcused absence, you will get a zero for that quiz. No make-up quizzes will be given. The grade for the quizzes will be determined as follows:

% = total # of correct answers on all the quizzes/total # of questions on all the quizzes (“Select all that apply” questions count as more than one answer);

<table>
<thead>
<tr>
<th>Grade</th>
<th>A</th>
<th>AB</th>
<th>B</th>
<th>BC</th>
<th>C</th>
<th>D</th>
<th>F</th>
</tr>
</thead>
<tbody>
<tr>
<td>%</td>
<td>100-93</td>
<td>92.9-87</td>
<td>86.9-81</td>
<td>80.9-75</td>
<td>74.9-69</td>
<td>68.9-60</td>
<td>0-59.9</td>
</tr>
</tbody>
</table>
• Undergraduate Papers:

<table>
<thead>
<tr>
<th>Assigned</th>
<th>Due</th>
<th>Paper Length</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jan 28</td>
<td>Feb 4</td>
<td>575-625 words (2 pages)</td>
<td>10%</td>
</tr>
<tr>
<td>Feb 16</td>
<td>March 1</td>
<td>1,750-1,850 words (6 pages)</td>
<td>25%</td>
</tr>
<tr>
<td>April 7</td>
<td>April 21</td>
<td>1,750-1,850 words (6 pages)</td>
<td>35%</td>
</tr>
</tbody>
</table>

• Graduate Student Papers:

<table>
<thead>
<tr>
<th>Assigned</th>
<th>Due</th>
<th>Paper Length</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jan 28</td>
<td>Feb 4</td>
<td>575-625 words (2 pages)</td>
<td>10%</td>
</tr>
<tr>
<td>Feb 16</td>
<td>March 1</td>
<td>First draft 2,400-3,000 words (8-10 pages); or 2,350-2,450 words (8 pages)</td>
<td>NA/25%</td>
</tr>
<tr>
<td>April 7</td>
<td>April 21</td>
<td>Final draft 4,675-4,925 words (16 pages); or 2,350-2,450 words (8 pages)</td>
<td>60%/35%</td>
</tr>
</tbody>
</table>

• Late Paper Policy: You must hand in all the papers to pass this course. You may not elect to opt out of a paper and receive an F on it. Papers are due at the beginning of class on the due date. Papers handed in during class but after the beginning of class (= 10 minutes into class) will be bumped to the next letter grade or half-letter grade down (e.g., from an A to an AB, from a C to a D.) After that, the penalty is one full letter grade per 24 hours. Any non-emergency extensions must be requested prior to the due date, and will be granted only in rare circumstances. Although you are encouraged to discuss your papers with friends and classmates, no group work is allowed.

• Incompletes: I think incompletes are almost invariably a bad idea both for the student and the professor, and they will only be granted in rare cases of truly extenuating circumstances. An incomplete will only be granted after the student and I have come to an agreement about when the work for the course will be completed. If the work is not completed by the agreed-upon date, the incomplete will be changed to an F.

G. Additional Class Policies

Academic misconduct: Please note that the imposition of any penalty for any kind of academic misconduct (e.g., plagiarism, trying to get credit for a class you didn’t attend, cheating on an exam, etc.) results in a permanent note that goes into your academic file, and that UW will disclose the fact that you were penalized for academic misconduct to interested parties who request that information. See http://www.wisc.edu/students/resources/misconduct.htm for UW’s policy. Because you are responsible for proper acknowledgement and citation of other people’s ideas, even unintentional plagiarism counts as academic misconduct for the purposes of this course.

Classroom Etiquette: You are expected to behave in ways that are appropriate and respectful to the professor and the other students. This includes, but is not limited to

1. Arrive on time. Students who walk into the classroom late create a distraction.
2. Refrain from packing up until class is completely over.
3. Refrain from private conservations with classmates during lecture or discussion.

© 2016 Streiffer
4. Being patient and courteous to other students when they ask a question or make a comment.
5. Express disagreement with the comments of others in a respectful manner.
6. Remove sunglasses and hats.
7. Stay awake.
8. Refrain from reading any non-course-related material.
9. Turn off any cell phones when entering class. (Parents are exempted, but please turn phones to vibrate.)
10. Refrain from using laptops for anything other than note-taking. Anything else can be very distracting for students sitting around you.

H. Outside Resources for Help
The Writing Center has several classes and numerous handouts on academic writing. They will also provide individual writing instruction. Appointments can be made by stopping in at 6171 Helen C. White or calling 263-1992. Their web site is http://www.writing.wisc.edu/. They can be much more effective if you approach them early in the writing process. Strunk and White’s classic Elements of Style is a good general guide to writing, and Anthony Weston’s Rulebook for Arguments is a good guide to philosophical writing. I am also happy to help you with specific questions, or will review a paragraph for writing style tips.

Study Skills: UW, as well as many other universities, have on-line materials available on how to improve your study skills as an undergraduate, and I encourage you to take a look at the URLs below and try to benefit from them.

http://guts.wisc.edu/

The University of Wisconsin-Madison supports the right of all enrolled students to a full and equal educational opportunity. The Americans with Disabilities Act (ADA), Wisconsin State Statute (36.12), and UW-Madison policy (Faculty Document 1071) require that students with disabilities be reasonably accommodated in instruction and campus life. Reasonable accommodations for students with disabilities is a shared faculty and student responsibility. Students are expected to inform me of their need for instructional accommodations by the end of the third week of the semester, or as soon as possible after a disability has been incurred or recognized. I will work either directly with you or in coordination with the McBurney Center (http://www.mcburney.wisc.edu/) to identify and provide reasonable instructional accommodations. Disability information, including instructional accommodations as part of a student's educational record, is confidential and protected under FERPA.

Jim Pryor has a very helpful page on how to read and write philosophy papers at

http://www.jimpryor.net/teaching/guidelines/reading.html
http://www.jimpryor.net/teaching/guidelines/writing.html

Keep in mind that some of the comments on writing a paper will not always be appropriate for every particular paper topic.
1. Tuesday, January 19
   Introductions; Course Content; Moral Theory and Argumentation

I. Recombinant DNA Techniques (6 Meetings)
   I will go over administrative details, provide an overview of the content and requirements of the course, and provide a brief history of biotechnology. After an introduction to the basics of recombinant DNA technology, we will evaluate some of the ethical arguments people were making in the early 1970s both for and against the use of recombinant DNA techniques. Although rDNA techniques are now known to be quite safe, the arguments are interesting both because they provide a historical context to the current debate, and because many of the current arguments are similar in form to the ones given originally. We will explore such questions as the following. Is all genetic engineering unnatural, and if it is, does that make it intrinsically wrong? What does it mean to say that an activity is unnatural, anyway? How should decisions be made under conditions of uncertainty? What grounds the state’s right to restrict certain kinds of activities? Is the fact that a group finds a kind of activity offensive a legitimate reason for the state to restrict that activity?

2. Thursday, January 21
   The Basics of Recombinant DNA Techniques; Intrinsic Objections

3. Tuesday, January 26
   Extrinsic Objections I

4. Thursday, January 28
   Extrinsic Objections II
   First paper topic handed out

5. Tuesday, February 2
   Principles of Legitimate Legislation I
6. **Thursday, February 4**  
   First paper topic due at the beginning of class  
   **Principles of Legitimate Legislation II**  

7. **Tuesday, February 9**  
   Overflow  
   **II. Plant Biotechnology (5 Meetings)**  
   In this section, we will explore various theories regarding the duties we have to plants, species, and the environment, we will familiarize ourselves with the current applications and regulations of plant biotechnology, and we will explore views about the role of experts and of public opinion in a democracy. With that framework as background, we will then examine issues regarding environmental risk, labeling, and humanitarian uses of agricultural biotechnology.

8. **Thursday, February 11**  
   **Regulatory Background on Genetically Engineered Crops**  

9. **Tuesday, February 16**  
   **The Ethics of Labeling GE Food**  
   2nd paper topic handed out  

10. **Thursday, February 18**  
    **Environmental Ethics & GE Crops**  
11. **Tuesday, February 23**  
**The Humanitarian Argument for Agricultural Biotechnology**  
b. Ingo Potrykus, “The ‘Golden-Rice’ Tale” (16 pages)  

12. **Thursday, February 25**  
**Overflow**  

III. **Animal Biotechnology (3 Meetings)**  
In this section, we will survey the techniques and uses of animal biotechnology, and evaluate some of the concerns that have been expressed about them. We will look at arguments about the moral status of animals, the ethical justifiability of their use as food or in medical experimentation, the particular issues raised by genetic engineering to animals, and at the ethics of creating part-animal, part-human chimeras.  

13. **Tuesday, March 1**  
**The Ethics of Using Animals in Biomedical Research I**  
**2nd paper topic due at the beginning of class**  

14. **Thursday, March 3**  
**The Ethics of Using Animals in Biomedical Research II**  

15. **Tuesday, March 8**  
**Human/Animal Chimeras I**  

IV. Human Biotechnology (4 Meetings)

In this section, we will look at the application of biotechnology to human beings. In particular, we will look at human enhancement and human cloning.

16. Thursday, March 10
Overflow

17. Tuesday, March 15
Overflow

18. Thursday, March 17
Human Enhancement I

Tuesday, March 22 & Thursday, March 24: Spring Break

Tuesday, March 29 & Thursday, March 31: Will Be Rescheduled for Livestock Lab Tour and Biotech Center Tour

19. Tuesday, April 5
Human Enhancement II

20. Thursday, April 7
Human Cloning

   

21. Tuesday, April 12
CRISPR

   

V. **Biotechnology Patenting (3 Meetings)**

In this section, we will look at the patent law system and the main court cases involving biotechnology. We will address such questions as the following. What, if anything, ethically justifies the patent law system? How do academic-industry relationships in biotechnology affect academic freedom? Does allowing life patents encourage harm or fail to show proper respect to the environment or traditional cultures?

22. **Thursday, April 14**

**Ethical Evaluation of Patents on Living Organisms**

23. **Tuesday, April 19**

**Biotechnology Patents and Academic Freedom**

24. **Thursday, April 21**

**Biotechnology Patents and Academic Freedom**

3rd paper topic due

Overflow

VI. **Ethics Debates (4 Meetings)**

In this section, we will do two in-class debates.

25. **Tuesday, April 26**

First debate prep

26. **Thursday, April 28**

**Monarch butterfly debate**
